Ralph Grishman

May 1996 **Proceedings of a workshop on held at Vienna, Virginia: May 6-8, 1996****Publisher:** Association for Computational LinguisticsFull text available: pdf(2.09 MB) Additional Information: [full citation](#), [abstract](#)

The TIPSTER Program aims to push the technology for access to information in large (multi-GB) text collections, in particular for the analysts in Government agencies. Technology is being developed for document detection ("information retrieval") and for data extraction from free text.

Robin Abraham, Martin Erwig

May 2006 **Proceeding of the 28th international conference on Software engineering ICSE '06****Publisher:** ACM PressFull text available: pdf(1.09 MB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

We present a study investigating the performance of a system for automatically inferring spreadsheet templates. These templates allow users to safely edit spreadsheets, that is, certain kinds of errors such as range, reference, and type errors can be provably prevented. Since the inference of templates is inherently ambiguous, such a study is required to demonstrate the effectiveness of any such automatic system. The study results show that the system considered performs significantly better than ...
